

# U.S. Donor Conceived Council

*a voice for donor conceived people*

## Who We Are

U.S. Donor Conceived Council was established in late 2021 as the first all-volunteer nonprofit run by donor conceived people (DCP) and devoted to advocating on behalf of DCP. USDCC strives to increase awareness of the needs, interests, and challenges of DCP and advance change that promotes and protects their health, welfare, and human rights. Our vision for a better future begins by prioritizing the best interests of DCP in all matters involving donor conception.

## What We Do

USDCC does not tolerate discrimination. We do not tolerate homophobia or transphobia. We acknowledge and respect diverse family structures.

### → Advocacy

We work to protect the rights and interests of DCP in the United States. USDCC has developed Example Legislation that protects the best interests of DCP while considering the input of stakeholders.

### → Engagement

We engage with DCP and collaborate with diverse stakeholders. USDCC is committed to connecting with the people we serve and with those we hope to educate.

### → Resources

We educate on the needs and interests of DCP and provide resources for donors, intended parents, and others through content such as our Ask A Therapist column and survey of sperm bank practices.
